PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience across full stack development, AI/LLM engineering, cyber security operations, and business process automation. Built and shipped RBAC-enabled CRM platforms and AI-driven verification tools from the ground up, and worked with SIEM/SOAR security platforms and cloud infrastructure. Personally tested and evaluated over 60 AI tools to find what actually improves a development workflow.

TECHNICAL SKILLS

Programming Languages	Python, JavaScript, TypeScript, SQL, HTML, CSS
Frontend Development	React.js, Next.js, Tailwind CSS, Responsive Web Design
Backend Development	Node.js, Express.js, RESTful APIs, RBAC, Authentication Systems
Databases & Storage	PostgreSQL, MySQL, Supabase, Airtable
AI & Automation	Prompt Engineering, LLM Evaluation, Grounded Search, AI Agents, ChatGPT, Claude, Gemini, Cursor, Groq, AI Studio, Workflow Automation
Cyber Security & Operations	Google Security Operations (SIEM/SOAR), Chronicle, Microsoft Sentinel, OSINT, Threat Intelligence, Security Monitoring, Vulnerability Assessment
Developer Tools & Platforms	Git, GitHub, Docker, Postman, Google Cloud Platform (GCP), Chrome Extension Development, Tableau, Power BI

PROFESSIONAL EXPERIENCE

Business Analyst (Independent Contractor), Turing

Mar 2026 - Present | Remote

- Selected through Turing's global talent network to analyze business workflows and technical requirements.
- Defined technical specifications and process improvements that streamlined day-to-day operations.
- Used AI-assisted analytical tools to speed up requirement gathering and problem resolution.

Full Stack Developer (Freelance), Paryatan

Jan 2026 - Aug 2026 | Remote

- Built PARYATAN end to end, an AI-powered tourism management platform connecting travelers, local businesses, and administrators.
- Set up role-based access control, multi-role onboarding, and automated CRM workflows for inquiry tracking.
- Built admin dashboards for real-time user management, platform analytics, business approvals, and content moderation.

Full Stack Developer (Freelance), Benefits Business Solutions

Jan 2026 - Aug 2026 | Remote

- Built a centralized operations platform covering candidate tracking, recruitment pipelines, and lead management.
- Designed the backend database APIs and RBAC security model used to manage sensitive employee and customer data.

Coding Specialist, AI Trainer, Invisible Technologies

Jul 2025 - Nov 2025 | Remote

- Validated AI-generated code snippets across multiple languages to improve model response accuracy.
- Ran quality checks on large datasets to keep data integrity high and consistent for training benchmarks.
- Reviewed complex LLM reasoning outputs to catch logical bugs and refine fine-tuning datasets.

AI Training Coding Expert, Outlier AI

Oct 2024 - Dec 2024 | Remote

- Reviewed LLM code generations and gave structured feedback on efficiency, security, and requirement adherence.
- Caught subtle edge cases and algorithmic errors in synthetic datasets to improve model performance.

Junior Full Stack Engineer Intern, Relevant Venture Studio

Aug 2024 - Dec 2024 | Mumbai, India

- Built responsive full stack applications using React.js and Node.js with secure REST API architectures.
- Designed backend workflows and database schemas that cut query latency and improved app performance.
- Worked with cross-functional product teams to ship feature enhancements on tight production schedules.

Salesforce Developer Virtual Intern, Salesforce

Sep 2023 - Nov 2023 | Virtual

- Configured CRM business logic, automated process workflows, and built analytics dashboards for enterprise tracking.

KEY PROJECTS

AI-Assisted News Verification Chrome Extension

- Built a browser extension using Gemini 2.5 Pro to pull YouTube transcripts and parse factual claims in real time.
- Wired up Google Grounded Search for automated cross-verification, producing instant trust scores and credibility summaries.

AI Scheduling Agent, AMD AI Sprint (IIT Bombay)

- Built an autonomous scheduling agent using LLMs to parse context, resolve conflicts, and automate calendar workflows.

Facial Authentication System

- Built a biometric login system using OpenCV and facial recognition libraries for secure authentication.

CERTIFICATIONS & BADGES

- Google Security Operations: Chronicle Deep Dive, SIEM, SOAR, Unified SecOps
- Cloud & Security: Google Cloud Arcade Hands-On Challenges, Microsoft Sentinel Labs, Udacity Ethical Hacking Foundation, Microsoft Azure Fundamentals (AZ-900 Prep)
- Data Analytics: Career Essentials in Data Analysis (Microsoft & LinkedIn), Tableau Essential Training, Power BI Essential Training, KPMG AU Data Analytics

HACKATHONS & ACHIEVEMENTS

- AMD AI Sprint Hackathon, IIT Bombay (2025): Built an autonomous LLM scheduling assistant.
- Smart India Hackathon (2023 & 2024): Selected participant solving national-level challenges.
- Industry Hackathons: Participant in Hacker House Goa, Aeravat SPIT 2024, and Mumbai Hacks 2024.
- AI & Product Research: Reviewed and evaluated 60+ AI tools, sharing technical insights and architectural evaluations on LinkedIn.

EDUCATION

Bachelor of Engineering, Computer Science (IoT, Cyber Security & Blockchain)

University of Mumbai | 2021 - 2025
